EXPERIENCE

FORWARD DEPLOYED AI ENGINEER - CARBONFACT - PARIS, FRANCE SINCE JUNE 2025

Y Combinator-backed, fast-growing climate tech startup building a carbon accounting platform for the fashion and textile industry, used by top brands

- Owned the full client lifecycle across 15+ fashion brands (pre-sales, onboarding, and long-term account management), turning their complex supply chain data into audit-ready carbon analytics
- Built various AI-powered data connectors for clients that power a custom LCA (life cycle assessment) engine, to generate powerful strategic sustainability insights

Technologies: Python, Claude API, BigQuery, dbt, Google Cloud, Next.js, NestJS

FULL-STACK SOFTWARE ENGINEER - PARTOO - PARIS, FRANCE SEPT 2023 - MAY 2025

Developed various features to help synchronize 400k stores information across major platforms (Google, Facebook, Waze, etc)

- Engineered new feature developments for the *store presence management* product
- Front-end feature development in collaboration with product designers

Technologies: Python, FastAPI, Celery, PostgreSQL, React, Typescript

DATA ENGINEER - CELSIUS ENERGY - CLAMART, FRANCE JULY 2022 - AUG 2023

Developed workflows for geothermal heating and cooling solutions

- Implemented and deployed data pipelines for real-time construction analytics using IoT sensors
- Designed real-time dashboards for monitoring building energy efficiency metrics

Technologies: Python, Spark, Databricks, Azure, Terraform, Angular, PowerBI

DATA SCIENTIST - SCHLUMBERGER - CLAMART, FRANCE NOV 2019 - JUNE 2022

Developed predictive analytics algorithms for anomaly detection in drilling operations

- Implemented real-time algorithms to work with streaming sensor data for a major oil and gas clients
- Validated algorithms using large-scale time series data engineering

Technologies: Python (numerical computing, Dash), C#, Custom large scale data compute platform

EDUCATION

MSC. SIGNAL PROCESSING - ELECTRICAL AND ELECTRONIC ENGINEERING

IMPERIAL COLLEGE LONDON 2018-2019 - LONDON, UK

BSC. ELECTRICAL AND ELECTRONIC ENGINEERING

ECOLE POLYTECHNIQUE FÉDÉRALE DE LAUSANNE (EPFL) 2014-2018 - LAUSANNE, SWITZERLAND

SKILLS

SOFTWARE

AI & ML: Agentic workflow integration, ML libraries (Keras, TensorFlow)

Full-stack development: FastAPI, Celery, PostgreSQL, React

Data engineering: SQL, Spark, Databricks, Streaming technologies (Kafka, Azure Event Hubs)

LANGUAGES

English (native), French (native), Hindi (native), Spanish (fluent), Mandarin (scholar level)

LIFE

Self taught **guitar player** (using YouTube)

Fitness enthusiast (strength training and running)

Curiosity and a deep desire to keep learning (love reading books)
